*Rs. 0.75 crore released in 2005-06

Utilisation of waste surface water

945. SHRI THANGA TAMIL SELVAN: Will the Minister of WATER RESOURCES be pleased to state:

(a) the quantum of surface water that flows waste into the sea annually;

(b) the quantum of water required to meet water scarcity in the country;

(c) whether Government have any plans to harness the wate flowing surface water to meet the demand for water; and

(d) if so, the details thereof?

THE MINISTER OF STATE IN THE MINISTRY OF WATER RESOURCES (SHRI JAI PRAKASH NARAYAN YADAV): (a) to (d) The average annual water availability in the country is assessed as 1869 Billion Cubic Metre (BCM). Owing to topographic, hydrological and other constraints, the utilizable water is assessed as 1122 BCM. Rest of the water could be considered to be flowing down to sea.

The availability of water for the conry as whole is considered adequate to meet the present level of demand of water for diverse purposes. However, there are considerable spatial and temporal variations in the availability of water.

With a view to optimally utilize the available resources, several measures for development and management of water resources as undertaken by the respective State Governments which include creation of storages, restoration of water bodies, rain water harvesting, artificial reacharge to ground water and better management practices etc.

Rain water harvesting

946. DR. M.A.M. RAMASWAMY: Will the Minister of WATER RESOURCES be pleased to state:

(a) whether Government have started rain water harvesting in Central Government buildings all over the country;

(b) if so, the details thereof;

(c) if not, the reasons therefor;
